DATE MAILED: 08/09/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/666,859

Applicant(s)

MELVILLE, ROBERT T.

Examiner

David J. Parsley

Art Unit

3643

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 May 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 3-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 3-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 18 September 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Art Unit: 3643

Detailed Action

Amendment

1. This office action is in response to applicant's amendment dated 5-25-05 and this action is final.

Claim Objections

2. Claims 12-16 are objected to because of the following informalities: there is no claim 11 as seen in applicant's claims and claims 12-16 have been renumbered 11-15. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3-4, 7 and 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 5,778,592 to Malmberg.

Referring to claim 3, Malmberg discloses a dual fishing rod holder comprising, a tip-down fishing rod holder – at 50,64,72, adapted for insertion into a fishing rod handle receiver – at 51, installed on a boat – see figure 1, the tip-down fishing rod holder being substantially L-shaped – see the combination of items 50,64 in figure 1, and having a proximal end and a distal end – see figure 1, and the tip-down fishing rod holder being secured at its proximal end to the receiver and extending rearwardly and at an angle from the receiver – see for example figures 1-2 and 7-9, a fastener – at 88-90, at the distal end of the tip-down fishing rod holder – see figure 1, wherein the fastener is adapted to secure a first fishing rod – at 24, and freely suspend the first fishing rod – see for example figures 1-2 and 7-9, and a tip-up fishing rod holder – at 64a-76a, coupled to the proximal end of the tip-down fishing rod holder disposed at an angle relative to the first fishing rod holder – see for example figure 1, the tip-up fishing rod holder adapted to securely receive a handle of a second fishing rod and hold the second fishing rod at a substantial angle relative to the first fishing rod – see for example figures 1-2 and 7-9 and column 5 lines 43-47 which describes the fishing rod holders being capable of being placed in positions which are substantially angularly apart with respect to each other, wherein the second fishing rod holder is secured at a distance from the top of the proximal end of the first fishing rod holder – see for example figures 1-2 and 7-9.

Referring to claim 4, Malmberg discloses a dual fishing rod holder comprising, a first fishing rod support – at 50,64,72, having a proximal section and distal section – see for example figures 1-2, wherein the proximal section is formed at an angle relative to the distal section – see for example figures 1-2, and the proximal section is adapted for insertion into a fishing rod handle receiver – at 51, installed on a boat, a fastener – at 88,90, coupled to the distal section of

Art Unit: 3643

the fishing rod support – see for example figures 1-2, wherein the fastener is adapted to secure a first fishing rod – at 24, and a fishing rod holder – at 64a-78a, fixedly coupled to and substantially parallel to the proximal section of the fishing rod support – see for example figures 1-2 and 7-9 and column 5 lines 43-47 which describes a fixed connection, the fishing rod holder adapted to securely receive a handle of a second fishing rod and hold the second fishing rod at a substantial angle relative to the first fishing rod – see for example figures 1-2 and 7-9 and column 5 lines 43-47, wherein the second fishing rod holder is secured at a fixed distance from the top of the proximal end of the first fishing rod holder – see for example figures 1-2 and column 5 lines 43-47, which describes the fixed positions of the rod holders.

Referring to claim 7, Malmberg discloses the distance from the top of the proximal end of the first fishing rod holder to the second fishing rod holder is fixed – see for example figures 1-2 and 7-9 and column 5 lines 43-47 which describes the rod holders being placed in fixed positions.

Referring to claims 14-15, Malmberg discloses the tip-down fishing rod holder/fishing rod support is a formed cylindrical tube – see at 50 and 64 in figures 1-2, and the tip-up fishing rod holder/fishing rod holder is a straight cylindrical tube – see for example at 64a in figures 1-2.

Claims 5-6 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,673,507 to Stokes.

Referring to claim 5, Stokes discloses a dual fishing rod holder comprising, a first tube – at 46 or 48, characterized by a proximal section and a distal section – see for example figure 2, the first tube having a bend – see proximate 42 or 42' in figure 2, forming an angle between the proximal section and the distal section – see for example figure 2, a fastener – at 60,62 and one

Art Unit: 3643

of 80 as seen in figure 2, coupled to the distal section of the first tube – see figure 2, the fastener couplable to a first fishing rod and adapted to secure the first fishing rod – see for example figure 2, and a second tube – at the other of items 80, coupled to the proximal section of the first tube and at an angle relative to the distal section of the first tube, the second tube adapted to receive a handle of a second fishing pole – see for example figure 2, wherein the proximal section of the first tube is so sized and dimensions to be inserted into a receiver – at 20-36, on a boat – at 100 – see for example figure 2.

Referring to claim 6, Stokes discloses the fastener coupled to the distal section of the first tube is adapted to allow at least two degrees of freedom in the first fishing rod when the first fishing rod is coupled to the fastener – see for example figure 2.

Referring to claim 13, Stokes discloses the fastener coupled to the distal section of the first tube is adapted to allow three degrees of freedom in the first fishing rod when the first fishing rod is coupled to the fastener – see for example figure 2.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3643

Claims 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Malmberg as applied to claims 3 or 4 above, and further in view of U.S. Patent No. 6,088,946 to Simmons.

Referring to claims 8 and 10, Malmberg does not disclose the fastener comprises a cord and a hook. Simmons does disclose the fastener comprises a cord and a hook – at 76-77. Therefore it would have been obvious to one of ordinary skill in the art to take the device of Malmberg and add the fastener comprising a cord and a hook of Simmons, so as to allow for the fishing rod to be securely held by the device.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Malmberg as applied to claim 3 above, and further in view of U.S. Patent No. 4,485,579 to Hawie. Malmberg does not disclose the rod holder is an aluminum or steel cylindrical tube. Hawie does disclose the rod holder is a steel cylindrical tube – see for example column 2 lines 16-38. Therefore it would have been obvious to one of ordinary skill in the art to take the device of Malmberg and add the steel tube of Hawie, so as to allow for the device to be made rigid and durable for repeated use.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Malmberg as applied to claim 4 above, and further in view of U.S. Patent No. 4,876,980 to Bell. Malmberg does not disclose the fishing rod support is unitary structured. Bell does disclose the fishing rod support – at 28,38-46, is unitary structured – see for example figures 1-4. Therefore it would have been obvious to one of ordinary skill in the art to take the device of Malmberg and add the device being unitary structured of Bell, so as to allow for the device to be easily and quickly manufactured.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stokes as applied to claim 5 above, and further in view of U.S. Patent No. 6,088,946 to Simmons. Stokes does not disclose the fastener comprises a cord and a hook. Simmons does disclose the fastener comprises a cord and a hook – at 76-77. Therefore it would have been obvious to one of ordinary skill in the art to take the device of Stokes and add the fastener comprising a cord and a hook of Simmons, so as to allow for the fishing rod to be securely held by the device.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David J. Parsley whose telephone number is (571) 272-6890. The examiner can normally be reached on 9hr compressed.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Poon can be reached on (571) 272-6891. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
